

# NeverLube Backwash Valve

## NeverLube Backwash Valve

*—Jandy performance, NeverLube® reliability*

We used our revolutionary NeverLube® technology to create a new Backwash Valve. The 2-in-1 design makes it versatile for use on both sand and D.E. filters. Straight-through full flow port design optimizes flow and hydraulic efficiency. The Jandy Versa-Coupler allows easy installation on most brands of filters. NeverLube® technology on the diverter seal ensures it will never need lubrication and comes with a lifetime guarantee! It is simple to plumb and will provide years of trouble-free operation. Available in two models, 8034 and 8034J. The 8034J is pre-plumbed for use on Jandy DEL 48 and DEL60 filters.
