**A BEAUTIFUL HARMONY OF BRASS AND COPPER**

By day or night the simple lines of the patent pending FaroGiardino® adds elegance and function to any fine residence. Precision milled from solid brass and copper to Ferrari® tolerances, with the clean classic design of a country home, this pathway light transcends momentary style trends.

The design lines of the FG-12 are at home in a wide range of surroundings from craftsman style architectures to tuscan gardens.

This geometrically perfect design is best used in focal color planter beds to bring the nighttime garden to life with its warm symmetrical circular pool of light. Use along pool patio edges, walkways and motor courts.

The copper will patina naturally over time and can be accelerated with solution spray. For patina formulas visit our website at: [www.FXL.com/learning/patina.htm](http://www.FXL.com/learning/patina.htm)

**SIMPLE ELEGANCE**

*Lighting should be used to highlight, not overpower. Use it to create boundaries and mystery. Lighting your landscape can be compared to the art of stage lighting. You must know where to strategically place your lighting to create emotion. You can illuminate paths, focus attention on fountains and enhance a gorgeous area of fauna. Different types of lighting can combine to create an intimate scene.*
