

create ATMOSPHERE

S.R.Smith Lighting allows you to transform your pool into a relaxing retreat or party central with LED lighting. The Treo Series, which includes models for fiberglass, gunite and vinyl liner pools, provides white or color light options. These low voltage lights are ideal for retrofit applications or new installations. Used in conjunction with our control systems, you can customize the look of your pool to fit your mood.

CONTROL SYSTEMS

We offer lighting control options for new construction and retrofit applications. Our PT-6000 is the ideal solution to upgrade existing fiber optic light systems to LED. With a range of installer friendly features and a simple to use, hand held remote, we've got the right solution for your next installation.
