
APCP-1700

Little Giant's uniquely designed automatic pool cover pump is ideal for removing water from all types of pool covers. The APCP-1700 activates in approximately 2" of water and deactivates in approximately 1.5" of water. The pump comes equipped with a low energy consumption, permanent-split capacitor (PSC) motor. The motor is mounted in a sealed, stainless steel housing and cooled by the flow of the pumping fluid over the motor housing. The APCP-1700 has a wide base design for needed stability.

Features

- Automatic pool cover drainage
- 1700 gallon per hour capacity
- Activates in approximately 2" of water
- 25' power cord
- Integrated handle for easy portability
- Wide base for stability
- Mechanical float for dependability
- No assembly required
- Energy efficient motor
- 270 watts
- 1" FNPT discharge w/garden hose adaptor
- 21.5' maximum lift

Construction

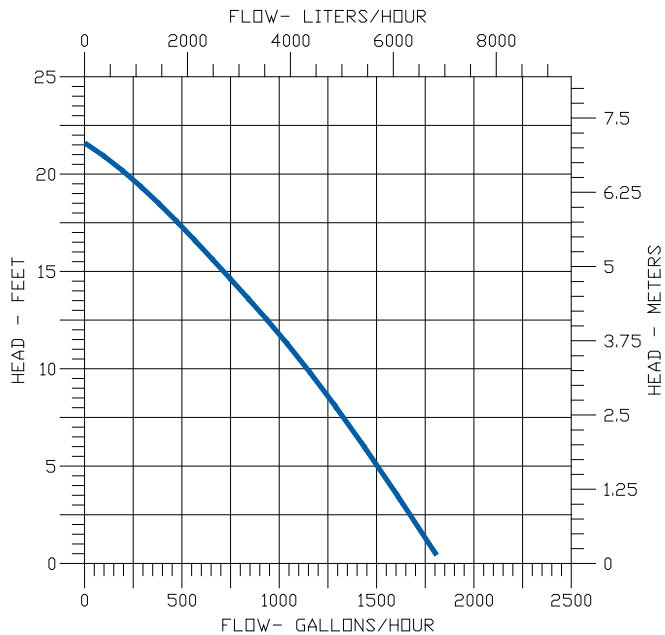

- Motor — 1/3 HP permanent split capacitor
- Intermittent Liquid Temp. up to 120°F
- Intake — Screened
- Discharge — 1" FNPT
- Housing — Glass-filled polypropylene
- Shaft Seal — Nitrile
- Electrical — 115V, 25' power cord
