first aid™**

Enjoy Clear Perfect
Soft Silky Water™

Pool First Aid combines a powerful broad spectrum natural enzyme formula with our organic clarifier to **fix pool problems fast...guaranteed!**

- Cleans water of dead algae, pollen, oil/fuel leaks, spills, anti-freeze residue, paint, vandalism and other forms of organic water contamination.
- Frees up clogged filters of oil and other forms of organic build-up.
- Removes dead algae quickly and efficiently, in most cases without the need to backwash.

Pool First Aid is a powerful pool problem-solver that works very fast - typically overnight - without scrubbing!

Pool First Aid is non-toxic and non-irritating. It's environmentally better.

Directions: Add two ounces per/thousand gallons (60ml per 3785L), one capful treats 2000 gallons (7500L). Broadcast **Pool First Aid** around the surface of the pool. Can be used every two days until the pool is crystal clear.

Apply directly to water line to quickly remove any existing water line build-up.

IMPORTANT: Allow chlorine levels to return to normal before adding **Pool First Aid**. If water temperature is below 70°F, **Pool First Aid** will work more slowly, so allow more time for results.

TIP: After you have cleaned-up your pool, switch to Natural Chemistry's **Pool Perfect+PHOSfree** to maintain a clean, clear and trouble-free pool...guaranteed!
