**pool  
perfect +  
PHOSfree**™ 

**Regularly maintains near zero  
phosphate and organic waste levels!**

**Regular pool maintenance is easy with Natural  
Chemistry's patented PHOSfree and natural  
enzyme technology.**

The outstanding benefits of Pool Perfect enzymes are combined with our industry leading phosphate removal technology. It is the only product that is added directly to the skimmer and does not cloud pool water. You will not find an easier, more reliable, trouble-free maintenance program.

Natural Chemistry's complete PHOSfree program results in clear, perfect water, no waterline rings, no chemical odors, and no phosphates.

**Natural Chemistry - Performance Guaranteed.**

It's so easy. Just add the required dosage weekly to your skimmer. It takes seconds, and no scrubbing is necessary. Pool Perfect+PHOSfree is derived from natural fermentation and minerals.

Note: Minor eye irritant. Rinse eyes with plenty of cool water if contact occurs.

**Directions:**

1. Shake Well Before Using - Contents Settle.
2. Each week, with filter running, simply add to your skimmer 1 capful per 8000 gallons (30,000L) of pool water. For example, two capfuls per week will treat a 16,000 gallon (60,000L) pool.

**At end of pool season use Natural Chemistry's  
'Pool Magic + PHOSfree' to keep phosphates low in  
off-season and reduce spring start-up time by 50%!**

PHOSfree is a registered trademark of Natural Chemistry Inc. and is protected under US patents 5,503,766 and 6,338,800.
