Enjoy Clear Perfect  
*Soft Silky Water*™

**METALfree** is a highly effective metal deactivation agent that prevents staining and discoloration from trace metals such as iron and copper. These trace metals may already be in the spa fill water or in water added to maintain water level. **METALfree** should be used as part of a well designed spa maintenance program.

**Note: METALfree does not raise phosphate levels in spa water.**

Various metals like iron and copper are frequently found in domestic tap water. These metals can build-up and lead to staining on spa surfaces. Due to regular topping up of spa fill water, it is recommended to dose weekly with METALfree.

**Directions:**

Add one capful (4oz.) per 400 gallons, (1oz. per/100 gal) directly to spa, immediately after initial fill and after each drain and refill.

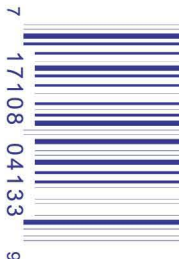

**Note:** Do not add this product through skimmer.

**MAINTENANCE:** Add one (1) ounce per 400 gallons per week. (one quarter of large cap)

**METALfree** is a powerful chelating agent. It should not be mixed with other chemicals. As with all chemicals, use caution. **KEEP OUT OF REACH OF CHILDREN. MAY IRRITATE EYES OR SKIN.** If eye contact occurs, rinse with plenty of cool water. Induce vomiting if swallowed.

Spa is safe to use 15 mins after treatment.

Spa METALfree works with all sanitizer systems.
