

Good
for the
environment...
Great
for your pool!

CV-700 Catalytic Enzyme & Phosphate Remover Pool Water Cleaner is an environmentally friendly, stabilized liquid enzyme system that effectively catalyzes organic contaminants and removes ortho-phosphates commonly found in pools, spas and other recreational water systems. Routine weekly application of CV-700 will positively maintain water clarity, prevent algae growth occurring, and stop interference with chlorine sanitizing in both conventional and salt water chlorination systems.

CV-700 Catalytic Enzyme & Phosphate Remover

With normal use, CV-700 is nonallergenic, non-irritating to sensitive skin tissue and non-toxic even if ingested. CV-700 is nonflammable and usable in any environment. Applied as directed, CV-700 is non-harmful to materials of construction, circulating water equipment, either painted or masonry surfaces, and is compatible with all filtration systems and other water treatment chemicals applied in accordance with manufacturer's recommendations.

APPLICATION

CV-700 is added directly to the water or circulating system at a typical maintenance rate of one (1) ounce per two thousand (2,000) gallons of water on a weekly treatment schedule to maintain water clarity and remove up to 500 ppb ortho-phosphate. In heavily contaminated systems, CV-700 may be initially dosed at a rate two (2) to four (4) times the normal maintenance level for two (2) weeks or more to bring the water quality to satisfactory levels. Thereafter, the normal maintenance rate should be employed. Under initial conditions of heavy contamination, some minimal water foaming may occur, and will dissipate as system cleanup progresses.

HANDLING

CV-700 is formulated to be inherently stable with an indefinite shelf life under normal storage conditions. Avoid exposure to freezing temperatures or prolonged storage at temperatures above 120° F. Either condition may degrade product packaging, and product quality or performance. Review the product's Material Safety Data Sheet before handling.
