## Section 4 - First Aid Measures

**Inhalation:** In the improbable event of product inhalation, remove the affected individual to fresh air and provide fresh air or artificial respiration as required. Obtain medical attention.

**Eye Contact:** Flush thoroughly with water for five minutes and obtain medical attention if irritation of eye membranes persists.

**Skin Contact:** Wash contacted areas with soap and water, apply emollient skin cream to minimize dryness and seek medical attention if irritation persists..

**Ingestion:** Drink several glasses of water. Obtain medical attention.

**After first aid, get appropriate in-plant, paramedic, or community medical support if exposure symptoms persist.**

**Note to Physicians:** Under normal use and human exposure conditions, the product is considered nontoxic and nonhazardous.

**Hazardous Combustion Products:** Thermal oxidative decomposition of the product may release toxic fumes of hydrogen chloride, and oxides of carbon, nitrogen.

**Fire-Fighting Instructions:** Do not release runoff from fire control methods to sewers or waterways.

**Fire-Fighting Equipment:** Because fire may produce toxic thermal decomposition products, wear a self-contained breathing apparatus (SCBA) with a full facepiece operated in pressure-demand or positive-pressure mode.

## Section 6 - Accidental Release Measures

### Spill Procedures:

#### Small & Large Spills

**Containment:** For all spills, pick up mechanically and place in suitable container for disposal. Do not release into sewers or waterways.

**Cleanup:** After product recovery and removal, flush spill area with water to a sanitary sewer.

**Regulatory Requirements:** Follow applicable OSHA regulations (29 CFR 1910.120).

## Section 7 - Handling and Storage

**Handling Precautions:** Wear appropriate eye and glove protection to minimize personal exposure.

**Storage Requirements:** Do not store with oxidizing or acidic materials. Keep containers tightly sealed, store at temperatures below 120°F.

**Regulatory Requirements:** None established.

## Section 8 - Exposure Controls / Personal Protection

### Engineering Controls:

**Ventilation:** In the improbable event of product misting, provide general or local exhaust ventilation systems to minimize airborne concentrations. Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.

### Administrative Controls:

**Respiratory Protection:** If product dusting occurs, follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH-approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. . If respirators are used, OSHA requires a written respiratory protection program that includes at least: medical certification, training, fit-testing, periodic environmental monitoring, maintenance, inspection, cleaning, and convenient, sanitary storage areas.

**Protective Clothing/Equipment:** Wear chemically protective gloves to prevent prolonged or repeated skin contact. Wear protective eyeglasses or chemical safety goggles, per OSHA eye- and face-protection regulations (29 CFR 1910.133). Contact lenses are not eye protective devices. Appropriate eye protection must be worn instead of, or in conjunction with contact lenses.

**Safety Stations:** Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

**Contaminated Equipment:** Separate contaminated work clothes from street clothes. Launder before reuse. Remove material from your shoes and clean personal protective equipment after use.

**Comments:** Never eat, drink, or smoke in work areas. Practice good personal hygiene after using this material, especially before eating, drinking, smoking, using the toilet, or applying cosmetics. KEEP AWAY FROM CHILDREN.
