*Do not use more than 8 oz at a time

*After adding 1st dose recheck phosphate level and add more accordingly

*Applied at the rate of 1 quart per 10,000 gallons will remove up to 10,000ppb of phosphates.

*Anything reading over 1000ppb on test kit is not measureable, treat for 3000ppb and retest

*Check filter pressure after addition, clean or backwash if necessary

*32oz=1qt, 128oz= 1g, 4qt= 1g
