Storage unit for all automatic cleaners

experience

American made quality...

The PoolCleaner Keeper (pat pend) is the ideal storage for when your cleaner is not in use.

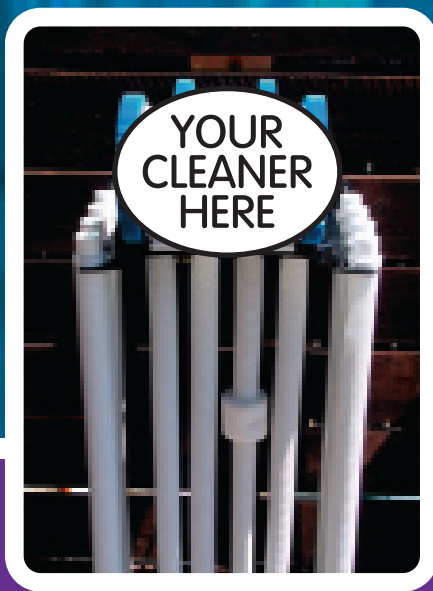

Can be used with any automatic swimming pool cleaner.

Dramatically prolongs the life of your cleaners hoses as it eliminates coiling.

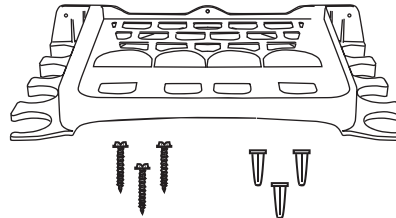

Keeps your cleaner safe and out of the way.

Can be used indoors and outdoors.

Easy to install.

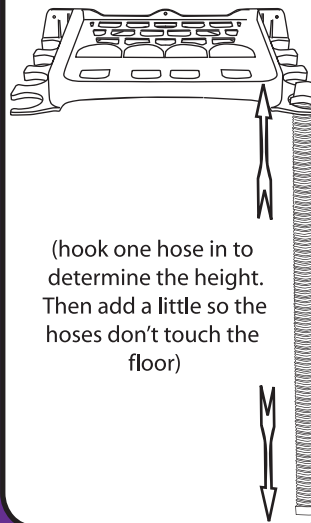

- 1** Each PoolCleaner Keeper comes with a Keeper, 3 screws and 3 wall anchors.

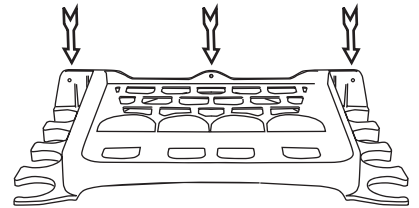

- 3** **Note:**
Some customers in cold areas prefer to use two PoolCleaner Keepers. One outdoors by the pool and one in the garage.

- 2** The height off the ground is determined by the length of your cleaner's hoses.

- 4** If the wall you want to mount the keeper to is wood then simply screw in the three screws

- 5** If you have stucco or brick walls you will have to mark each of the three holes with a pencil and then drill a 1/4" hole into the wall at each of the three locations.

Place the wall anchors into the holes.

Now you can screw the keeper onto the wall at each of the three locations.
